PROFILE

I am a final-year Informatics Engineering student at the Electronic Engineering Polytechnic Institute of Surabaya (EEPIS) and a passionate backend and mobile developer with hands-on experience in building well-structured, scalable digital platforms. I specialize in designing and developing robust backend systems and cross-platform mobile applications using technologies such as Laravel, RESTful APIs, Flutter, and state management solutions like Bloc and Provider. I take pride in creating clean, maintainable, and modular code, with a strong focus on performance, scalability, and clear architectural patterns. I am committed to delivering high-quality solutions and continuously enhancing my technical skills to stay aligned with industry best practices and the latest technological advancements.

EXPERIENCE

Backend Developer in PT. Punggawa Studio (PKM 2024)

July 2024 – Dec 2024

- Designing a database and implementing a RESTFUL API using the PHP programming language with the Laravel framework in creating an online course (GOLDMATE) application.
- Developing responsive user interfaces using the Laravel framework and Tailwind CSS

Mobile Developer & AI Developer in Vocadia (Final Project)

Dec 2024 - Jun 2025

- Responsible for designing the UI/UX of the application and developing mobile feature applications using the Dart programming language with the Flutter framework.
- Responsible for developing English language learning games with dynamically generated questions using AI, enabling more varied and challenging content based on grammatical tenses.

Academic Project – Blog Project (Social Media Website)

Sep 2023 - Des 2023

- Developed a full-stack social media-style web application where users can create profiles, view global posts, and engage in direct messaging.
- Utilized **React.js** for building a dynamic and responsive frontend, styled with **TailwindCSS** to ensure a modern and mobile-friendly UI.
- Built a RESTful API using **Express.js** to handle user authentication, post management, and chat functionalities.

Research Assistant – Human Centric Multimedia (HCM)

Dec 2024 – July 2025

- Involved in the preparation of research papers and journal publications, targeting national and international conferences related to multimedia, AI, and mobile computing.
-

EDUCATION

Informatic Engineering

2022 - Sekarang

Electronic Engineering Polytechnic Institute of Surabaya (EEPIS)

- IPK :3.24/4.00
-

ORGANIZATION

• Himpunan Mahasiswa PENS Sumenep (HMPS)

2023 - 2025
